Autodesk Advance Steel Essentials

Course Length: 4 days

This training course provides an overview of the basic commands that are required to create structures and associated documentation using the Autodesk Advance Steel software. This course focuses on the recommended workflow and the most common commands and options, along with alternate commands and helpful information for Autodesk Advance Steel users.

The major topics covered in the training guide are:

- Starting a project and working in 3D CAD, understanding the Advance Steel interface
- Coordinate systems and building grids
- Creating and editing structures
- Joints, beams and plates
- Connection and structural elements
- Other model objects
- Project explorer
- Validating a structure
- Numbering
- Creating and editing drawings
- Working with lists
- Other documents and file formats

Phone: 1300 667 263

Prerequisites:

Before taking this course, students need to be proficient with AutoCAD and have a basic understanding of structural steel terminology.

Technical Education Services

Table of Contents: Autodesk Advance Steel Essentials

Chapter 1: Introduction

- Overview
- Text Conventions
- Main Practice

Chapter 2: Starting a Project

- Template Files
- Project Data
- File Structure

Chapter 3: Working in 3D CAD

- Common CAD Commands
- Mouse View Commands on 3D
- Viewpoints
- Visual Styles

Chapter 4: The Advance Steel Interface

- Selecting Objects
- Advance Properties
- Advance Joint Properties
- Joint Boxes
- Deleting Objects
- Undo
- Object Snaps and 2D/3D Osnap

Technical Education Services

Chapter 5: Coordinate Systems

- 3D Coordinates
- World Coordinates
- User Coordinate System
- User Coordinate System

Chapter 6: Building Grids

- Creating a Building Grid
- Grid Properties
- Modifying Grids
- Level Symbols

Chapter 7: Basic Structures

- Structural Frames
- Placing Sections
- Beam Properties

Chapter 8: Visualization

- Overview
- Layer Management
- Common Basic CAD Editing Commands
- Transform Elements
- Advance Copy/Rotate/Array
- Advance Trim/Extend

Technical Education Services

Chapter 9: Automatic Joints

- Connection Vault
- Joint Properties
- Repeating Joints
- Joint Library
- Joint Groups

Chapter 10: Beam Features

- Introduction
- Coping or Notching Beams
- Shorten at UCS
- Cut at Object
- Notch
- Parametric Notch - Joint
- Beam Clearance
- Contour Features
- Editing Features
- Mitre
- Splitting and Joining Beams

Chapter 11: Plates

- Flat Plates
- Plate Properties
- Folded Plates
- Gratings

Technical Education Services

Chapter 12: Plate Features

- Contour Features
- Contour Processing Properties
- Plate Contour Features - non UCS
- Chamfers and Fillets
- Dividing and Joining Plates

Chapter 13: Connection Elements

- Bolts
- Bolt Properties
- Anchors
- Welds
- Edit Connected Objects

Chapter 14: Custom Connections

- Introduction
- Modeling the Custom Connection
- Building Bricks
- Creating Connection Template
- Insert Connection Template

Technical Education Services

Chapter 15: Structural Elements

- Bracing
- Stairs
- Hand Rails
- Cage Ladders
- Cladding
- 3D Drawing Tips

Chapter 16: Other Model Objects

- Concrete Objects
- Special Parts

Chapter 17: Project Explorer

- Introduction
- Levels
- Work Planes and Columns
- Model Views
- Queries
- Groups
- Show All Objects
- Structures

Technical Education Services

Chapter 18: Validating a Structure

- Clash Check
- Object Marking
- Technical Check
- Joint Design

Chapter 19: Numbering

- Model Role
- Numbering

Chapter 20: Creating Drawings

- Quick Documents
- Drawing Styles
- Drawing Processes
- Cameras
- Summary of Drawing Procedure
- View Orientation
- Setting up Quick Documents

Chapter 21: Editing Drawings

- Document Manager
- Manipulating Drawings
- Drawing Labels and Dimensions
- Object Properties

Technical Education Services

Chapter 22: Lists

- Quick Documents
- RDF Viewer
- Selective Lists
- Managing Lists

Chapter 23: Other Documents

- NC Files
- DXF Files
- Sharing Models and Drawings
- Data Exchange

Technical Education Services

Cancellation Policy

The following cancellation policy shall apply to all training and consulting engagements including customised training solutions:

Redstack reserves the right to reschedule or cancel the date, time and location of its class at any time. In the event that a Training Class is cancelled by Redstack, Customer is entitled to a full refund. Redstack shall not be responsible for any other loss incurred by Customer as a result of a cancellation or reschedule.

For Customer cancellations when written notice is received (i) at least ten (10) business days in advance of the class, Customer is entitled to a full refund of its payment or reschedule enrolment, (ii) less than ten (10) business days, Customer shall not be entitled to a refund, but shall receive a class credit to be used within three (3) months of the date of the original class.

Student substitutions are acceptable with at least two (2) days prior notice to the class, provided substitution meets course prerequisites and is approved by Redstack

For all Training orders, cancellation notices must be submitted in writing. Redstack is not responsible for any error in the delivery of the email notice. In the event of any reschedule of any training or consulting services by Customer, Redstack will invoice Customer for all non-cancellable travel expenses.

For more information, contact us on 1300 667 263.
