

## Technical Education Services

### AutoCAD Map 3D Essentials

Course Length: 3 days

This AutoCAD Map 3D training course introduces students to drawing based and geospatial features within the AutoCAD® Map 3D software.

Students learn about the features and functions of the AutoCAD Map 3D software, including how to create, manage, and map data. The training guide covers the fundamental topics of the AutoCAD Map 3D software.

After completing this AutoCAD Map 3D training, you will be able to:

- Describe the Autodesk Map 3D user interface.
- Create and edit geometry.
- Link and manage drawing-based attribute data.
- Use object classification.
- Connect to geospatial features.
- Edit geospatial features.
- Import and export drawing-based data.
- Work with raster images.
- Work with source drawings.
- Use source drawing queries.
- Stylize drawings and geospatial features.
- Plot maps.
- Use Survey Data.
- Use Lidar Data.
- Work with Industry Models.

# Technical Education Services

## Prerequisites:

This training guide is designed for the student who is new to the AutoCAD Map 3D software. It is recommended that you have a working knowledge of the following:

- Creating, opening, and saving drawing files, changing the display of a drawing by zooming and panning, displaying and docking toolbars, saving and restoring named views, using object snaps, and managing layers and controlling layer visibility.
- Microsoft® Windows® XP or Microsoft® Windows® Vista.

## Table of Contents

### Chapter 1: Getting Started

- Lesson: AutoCAD Map 3D User Interface

### Chapter 2: Creating and Editing Geometry

- Lesson: Using Coordinate Geometry
- Lesson: Performing Drawing Cleanup

### Chapter 3: Linking and Managing Drawing-Based Attribute Data

- Lesson: Creating and Attaching Object Data
- Lesson: Editing and Managing Object Data
- Lesson: Creating Dynamic Annotation
- Lesson: Connecting to a Database
- Lesson: Defining a Link Template and Linking Records to Objects
- Lesson: Using Database Information in a Drawing

### Chapter 4: Using Object Classification

- Lesson: Setting Up Object Classifications
- Lesson: Classify, Select, and Create Classified Objects

### Chapter 5: Importing and Exporting Drawing-Based Data

- Lesson: Importing and Exporting Data

## Technical Education Services

### Chapter 6: Establishing a Geospatial Environment

- Lesson: Connecting to a Feature Source
- Lesson: Using Coordinate Systems
- Lesson: Working with Point Data
- Lesson: Query Features on Connect

### Chapter 7: Editing Features

- Lesson: Editing Feature Attributes and Geometry
- Lesson: Typical Data Formats
- Lesson: Moving Data Between DWG Objects and FDO Features
- Lesson: Merging and Splitting Features
- Lesson: Enhanced Data Exchange

### Chapter 8: Working with Raster Images

- Lesson: Inserting Raster Images
- Lesson: Modifying Inserted Raster Image Properties and Behavior
- Lesson: Connecting to Raster Images
- Lesson: Working with DEM Files

### Chapter 9: Working with Source Drawings

- Lesson: Attaching Source Drawings
- Lesson: Working with Coordinate Systems

### Chapter 10: Using Source Drawing Queries

- Lesson: Define Property and Location Queries
- Lesson: Altering Properties During Queries
- Lesson: Using the Query Library
- Lesson: Save Back to Queried Drawings

## Technical Education Services

### Chapter 11: Stylizing Drawings and Features

- Lesson: About the Display Manager
- Lesson: Stylizing FDO Features

### Chapter 12: Plotting Maps

- Lesson: Prepare a Layout Sheet for Review
- Lesson: Map Books

### Chapter 13: Survey Data

- Lesson: Creating Survey Data Stores
- Lesson: Working with Survey Data Stores
- Lesson: Working with Point Clouds

### Chapter 14: Industry Models

- Lesson: Open, Edit, and Create an Industry Model

### Appendix A: AutoCAD Map 3D with 64-bit Windows

- Lesson: 64-bit Windows with Microsoft Office 2010 Loaded
- Lesson: Using the 64-bit Microsoft Access Engine with Windows 7 and 32-bit Microsoft Office

### Appendix B: Additional Exercises

## Technical Education Services

### Cancellation Policy

The following cancellation policy shall apply to all training and consulting engagements including customised training solutions:

Redstack reserves the right to reschedule or cancel the date, time and location of its class at any time. In the event that a Training Class is cancelled by Redstack, Customer is entitled to a full refund. Redstack shall not be responsible for any other loss incurred by Customer as a result of a cancellation or reschedule.

For Customer cancellations when written notice is received (i) at least ten (10) business days in advance of the class, Customer is entitled to a full refund of its payment or reschedule enrolment, (ii) less than ten (10) business days, Customer shall not be entitled to a refund, but shall receive a class credit to be used within three (3) months of the date of the original class.

Student substitutions are acceptable with at least two (2) days prior notice to the class, provided substitution meets course prerequisites and is approved by Redstack

For all Training orders, cancellation notices must be submitted in writing. Redstack is not responsible for any error in the delivery of the email notice. In the event of any reschedule of any training or consulting services by Customer, Redstack will invoice Customer for all non-cancellable travel expenses.

For more information, contact us on 1300 667 263.
